Description			
To whom it may concern			
I am a researcher broadly interested in environmental behaviour survey instruments and I have been having a look at the Environmental Behaviour module in wave 4 of the Understanding Society UK household longitudinal study.			
I wanted to understand the source of your questions in this module.			
I note helpfully you provide the sources, but I was having difficulty tracking down what "DEFRA adapted" may be.			
I believe "UKHLS" and "BHPS" to correspond to the Understanding Society and British Household Panel Survey respectively.			
I thought that "DEFRA adapted" might have referred to the consumer segmentation exercise DEFRA completed in 2008, but I was unsure about this.			
Any help you can offer would be most welcome.			
I look forward to hearing from you			
Best wishes			
Alex

Dear Alex,

Many thanks for your enquiry.

In general, the environmental behaviour questions were adapted/ derived from the following DEFRA surveys:

DEFRA TNS Omnibus 2010
DEFRA 2009 Attitudes Survey
DEFRA 2007 Attitudes survey

If there is a specific question you are interested in, we can let you know the original source of that item in particular.

Best wishes, Victoria.

On behalf of the Understanding Society User Support Team
