<b>Description</b>			
I would like to generate a industry and occupational dummy. would you tell me process step by step.			
many thanks and regards for your support Naz			

### History

#### #1 - 12/07/2016 03:08 PM - Victoria Nolan

- Status changed from New to Feedback
- Assignee changed from Alita Nandi to nazire begun
- % Done changed from 0 to 80
- Private changed from Yes to No

Dear Naz,

Please see the following Stata code:

```
gen occ_dummy=(<your occupation variable>==<values of whichever occupations you want to distinguish from the rest>)
lab def occ_dummy 0"<label for occupation group 1>" 1"<label for occupation group 2>"
lab val occ_dummy occ_dummy
```

Unfortunately we are unable to advise you on which occupations or industries you wish to distinguish.

Best wishes, Victoria

On behalf of the Understanding Society Data User Support Team
