Assignee:	Yujung Whang		
Category:			
Description I found the value label for "plbornc_all" variable is not complete. Value 28 and 29 are not labelled both in the dataset and in the online codebook. Could you please update this value label? Thanks!			

History

- Private changed from Yes to No

Hello,

In Wave 6: Portugal = 28 & 312, Brazil = 29 & 142
In Waves 1-5: Portugal = 312, Brazil = 142

In future releases, these codes will be reconciled.

Best wishes,
Alita
