Description			
I'm looking at the understanding society data for youths in 2009/10, 2011/12 and 2013/14. Could you tell me how many valid questionnaires were completed for youths in each of these waves and if possible give me exact figures for Wales? If you could provide response rates as well that would be great.

Hi Rebecca,

all information collected in the youth questionnaires is stored in the data file `_youth`. And each data file includes the variable `_country`. We provide frequency tables for all variables online, and it is very easy to find out the information you are looking for:

https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/1/datafile/a_youth/variable/a_country

https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/2/datafile/b_youth/variable/b_country

etc.

Response rates to the youth interview are published in the Understanding Society Quality Profile. If you were to calculate is yourself (e.g., for wave 6) you can examine the interview outcome variable `_ivfio` on the data file `_indall`.

the link to the Quality Profile is <https://www.understandingsociety.ac.uk/documentation/mainstage/quality-profile>
