<b>Description</b> Hi,  I would like to match partners for a given wave and ideally across waves. There is _ppid, the cross wave person identifier of partner. Where would I go from here? A very general description of what to consider or do next would be terrific.  Thanks a lot!

Dear Nico,

We offer an online training course via Moodle which will copefully help with your query:

<https://www.understandingsociety.ac.uk/documentation/training/online>

There is a specific worked example that will show how this can be done:

EXAMPLE 7: HOW TO MATCH INFORMATION OF ANY TWO HOUSEHOLD MEMBERS

We hope this helps, best wishes, Victoria.
