<b>Description</b> Hi, my name is Johannes Bennetzen and I am looking through the cognitive ability measures in understand society. As far as I can tell the surveys measure memory, subtraction, number series, verbal fluency and numeric ability. I am wondering if these measures have been worked out with any specific theory, such as the Woodcock Johnson test.

Dear Johannes,

Apologies for the delay in getting back to you.

The following paper summarises the provenance of the cognitive ability measures in Understanding Society:  
<https://www.understandingsociety.ac.uk/research/publications/523809>

Hope this helps,  
Best wishes, Victoria

On behalf of the Understanding Society Data User Support Team
