Description			
Hello:			
Can you describe how the variable "low density area for ethnic minorities" (a_Ida) is defined, or further clarify what this means? I see from the indresp file that slightly more than 52% of respondents live in a "low density area" (my tabulation is below), but that seems rather low?			
low density area for			
ethnic minorities			
	Freq.	Percent	Cum.
no	24,032	47.13	47.13
yes	26,962	52.87	100.00
Total	50,994	100.00

Sung Park,

The sample design is explained in this working paper

<https://www.understandingsociety.ac.uk/research/publications/working-paper/understanding-society/2009-02>

I hope this helps,

Jakob
