Description																																																															
Hello,																																																															
I would like to use pidp for the household reference person in data file c_indall, but it seems that the variable c_hrpid does not in general match pidp for any member of the household. I can work around this by using c_hrpno instead, but I just wanted to check whether there might be an error with c_hrpid or whether I have misunderstood something.																																																															
I used the following Stata code:																																																															
<pre>rename c_ * * gen x=hrpid-pidp if pno==hrpno tab x sort hidp pno brow hidp pidp hrpid pno hrpno x</pre>																																																															
I expected x=0, but this is true for only 9 cases. Here are the data for the first 4 households.																																																															
<table><thead><tr><th>hidp</th><th>pidp</th><th>hrpid</th><th>pno</th><th>hrpno</th><th>x</th></tr></thead><tbody><tr><td>68013604</td><td>68004087</td><td>68004088</td><td>1</td><td>1</td><td>1</td></tr><tr><td>68020404</td><td>68006127</td><td>68006128</td><td>1</td><td>1</td><td>1</td></tr><tr><td>68020404</td><td>68006139</td><td>68006128</td><td>2</td><td>1</td><td></td></tr><tr><td>68020404</td><td>68006135</td><td>68006128</td><td>3</td><td>1</td><td></td></tr><tr><td>68020404</td><td>68020564</td><td>68006128</td><td>4</td><td>1</td><td></td></tr><tr><td>68040804</td><td>68006807</td><td>68006808</td><td>1</td><td>1</td><td>1</td></tr><tr><td>68047604</td><td>68007487</td><td>68007488</td><td>1</td><td>1</td><td>1</td></tr><tr><td>68047604</td><td>68007491</td><td>68007488</td><td>2</td><td>1</td><td></td></tr><tr><td>68047604</td><td>68007499</td><td>68007488</td><td>3</td><td>1</td><td></td></tr></tbody></table>				hidp	pidp	hrpid	pno	hrpno	x	68013604	68004087	68004088	1	1	1	68020404	68006127	68006128	1	1	1	68020404	68006139	68006128	2	1		68020404	68006135	68006128	3	1		68020404	68020564	68006128	4	1		68040804	68006807	68006808	1	1	1	68047604	68007487	68007488	1	1	1	68047604	68007491	68007488	2	1		68047604	68007499	68007488	3	1	
hidp	pidp	hrpid	pno	hrpno	x																																																										
68013604	68004087	68004088	1	1	1																																																										
68020404	68006127	68006128	1	1	1																																																										
68020404	68006139	68006128	2	1																																																											
68020404	68006135	68006128	3	1																																																											
68020404	68020564	68006128	4	1																																																											
68040804	68006807	68006808	1	1	1																																																										
68047604	68007487	68007488	1	1	1																																																										
68047604	68007491	68007488	2	1																																																											
68047604	68007499	68007488	3	1																																																											
I have not checked all w_indall files, but found the same problem for wave 'e'.																																																															
Thanks very much.																																																															
Fiona

Dear Fiona,

Many thanks for your enquiry - you have indeed highlighted an error, which will be resolved in our next data release. In the mean time, you can link on c_hidp c_hrpno instead.

Best wishes, Victoria.
