Description			
<p>Hello, I would like to construct hourly wages with w_paygu_dv and w_jbhrs/w_jshrs for the employed and self-employed. So far, I have taken paygu_dv and divided it by 4.33 and by either jbhrs and jshrs to obtain hourly wages. I think I looked thoroughly enough, but I could not find the number of weeks worked per year in USoc. I guess I could construct a cleaner hourly wage variable if I had that information. So my short question is if there exists such a variable?</p>

Dear Nico,

Unfortunately this variable does not exist.

Best wishes, Victoria.
