Description			
Dear Alita,			
I have been using the qualoc variable for the different waves. However, I am curious about the derived variable. When I check on qualoc_dv, I get more people receiving a degree abroad than in the UK.			
When using qualoc from the different waves, I get what I expect, large number of folks obtained their degree in the UK. So what is qualoc_dv all about?			
I appreciate your insights.			
Thanks.			
Nico
