Description			
Dear Understanding Society Team			
For a sensitivity analyses we require information on dietary fat intake in order to be able to classify individuals into low, medium and high intake groups. I have extensively searched the website to find out whether dietary information is available for UKHLS that would allow inferring fat intake. However, my search was not successful. I just want to make sure that this information is indeed not available. Are there any variables on food intake? I would highly appreciate your help with this!			
Best regards Karoline

- % Done changed from 10 to 90

Questions were asked about selected broad food groups, the only one relating to fat is type of milk, asked at Waves 2,5,7,9.

https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/2/datafile/b_indresp/variable/b_usdairy

In the questionnaire these questions are included in the Nutrition Module

Best wishes,
Alita
