<b>Description</b> Hi I am interested in analysing responses the self esteem measure from the Youth self-completion questionnaire used in waves 2, 4 and 6. Is it possible to find out where the measure originates from? I see that six of the items come from the Rosenberg (1965) Self-Esteem Scale but am keen to find out if this version is an established adaptation. Many thanks Andrew

Hi

I was wondering if there is an update available on this issue?

Kind regards

Andrew

Dear Andrew,

The version we are using was carried forwards from the BHPS and we have been using this version since BHPS wave 9.

Before that, from when the youth questionnaire began in wave 4 until wave 8 we used a 5 question measure:
