Description			
Question:			
The BHPS data sets have a variable "linclastyear" which i am interested on. How is this variable constructed? Why does it not appear on the Questionnaire? What units is it on? Can it be compared for all the UK?			

History

- Target version set to BHPS
- % Done changed from 0 to 80

It is an undocumented variable and best ignored.

A couple of links to income variable documentation, which should be a better starting point;
