| <b>Description</b><br>Hi,<br><br>The scores for the SDQ total difficulties and subscale scores in wave 7 are incorrect. At first glance it looks like the variables have not been recoded or reversed scored. All other waves are correct.<br><br>Cara |                   |                    |            |

#### History

##### #1 - 02/26/2018 02:39 PM - Cara Booker

In wave 7 there is an extra code to many of the variables, 9 which is 'incorrect answer'. I think this is the source of the error as these codes are not set to missing and included in the derivation of the total and subscale scores.

Cara

##### #2 - 02/26/2018 02:39 PM - Cara Booker

This is the case for many of the youth questions and should be noted in the user guide or related documentation.

##### #3 - 03/01/2018 11:14 AM - Alita Nandi

- Category set to Derived variables
- Status changed from New to Resolved
- Assignee set to Cara Booker
- Target version set to M7
- % Done changed from 0 to 100
- Private changed from Yes to No

Hello Cara,

As Gundi has responded to you directly I am changing the status as resolved. But if you have further questions on this issue please let us know.

For other users: please refer to post <https://userswww.essex.ac.uk/support/issues/890> where this issue is discussed.

Best wishes,  
Alita
